Information Display

The Information display (board) is intended for support of movies by synchronous translation of scenes and subsequences. It may also be utilised in theatres and conferences for instant display of current information. Adjustment of the height allows to fit the board for any local requirement. Complete set includes remote control and software for synchronous movie support.

Parameter	Information display
Brightness levels	16
Resolution, (pixels)	32 x 320
Number of lines	4 / 2
Number of characters in a line	40 / 53
